

Welcome

OUTSTANDING MODERN FACILITIES

Under the State Schools of Tomorrow initiative the school now boasts all new facilities in B and C blocks. Student facilities in both these blocks are modern and provide options for the teachers with quiet spaces and technology corners as well as Interactive White Boards to ensure our students have the best possible facilities.

In C block the previous double teaching space has been transformed into a very comfortable and attractive flexible teaching / activity space with the provision of a modular wall which gives us a number of options on how to use the space.

In the junior Block (D) the new classroom setup is absolutely wonderful with secure teacher preparation areas and life skill areas being part of the room set up as well as quiet spaces. A new kitchen has also been installed in this block to provide a fantastic new environment for classes to enjoy.
